

HORIZONTAL SPLIT CASE THRUSTREAM

FOR WHERE IT REALLY MATTERS

SyncroFlo, Inc. is a leading manufacturer of centrifugal pumps and pre-engineered packaged systems.

SyncroFlo is an industry leading manufacturer of pumps and packaged systems with over 50 years of experience in the pumping industry. In 1962, SyncroFlo was the first company to pre-package domestic water pumping systems for the plumbing industry. Since pioneering the domestic water booster industry, SyncroFlo has maintained the quality and integrity that serve as the foundation for consistently over-delivering to customers.

PROVEN QUALITY

Most pumping applications are invariably demanding – typically operating in hostile, arduous or extreme temperature environments where design, integrity and quality matter. Using the most advanced computer

technology in the world, SyncroFlo designs, assembles, tests and ships all pump sets in Norcross, Ga., in an ISO 9001-2008 certified facility.

WATER PUMPING

Often operating 24 hours a day, 365 days a year, water pumping applications are highly energy intensive. In fact, pump capital purchases typically only represent 5% of total cost of ownership. With a complete line of general water pumps, or the highly efficient LOWEST LIFECYCLE COST (LLC) pumps, SyncroFlo has the pump that's best suited for your application. Customers can enjoy operating savings up to 5% per machine, per year, depending on the pump that's selected.

TYPICAL APPLICATIONS:

- Air Conditioning
- Sprinkler Systems
- Fire Fighting
- Booster Service

HORIZONTAL SPLIT CASE - THRUSTREAM

CONFIGURATION

Horizontal, vertical open shaft,
vertical direct mounted electric motor,
horizontal electric motor or engine driven

DISCHARGE & PERFORMANCE

- 2.5 in to 12 in
- Outputs up to 15410 gpm
- Heads up to 984 ft

FEATURES

- Axially split casing – rotating element can be removed without disturbing pipework
- High hydraulic efficiencies
- Double entry impellers reduce end thrust, increase efficiency and bearing life
- Shaft sleeves fitted as standard for soft packed pumps and as an alternative for mechanical seals. Stainless steel shafts fitted as standard for mechanical seals
- 40 models. Module design for maximum interchangeability
- Grease lubrication
- Soft packing or mechanical seals
- Suitable for baseplate mounting with coupling
- Approved to LPCB, FM and/or UL standards
- In compliance with NFPA 20
